

Alesta® SD

Excluded RAL-based colours

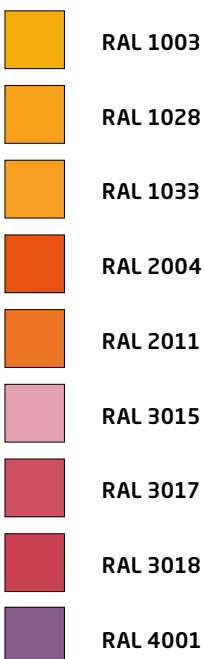

Alesta® SuperDurable RAL-based product range

is available in different finishes, smooth matt and semi-gloss or fine textured. We offer a vast range of RAL-based colours. The colours mentioned in this document cannot be developed in Alesta® SD quality.

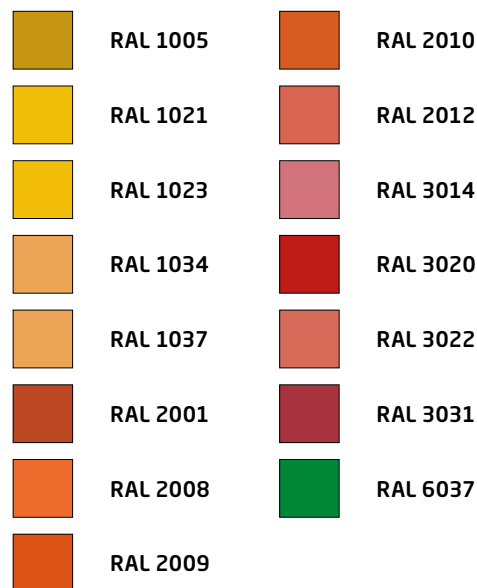

Excluded RAL-based colours for QUALICOAT class 2

The QUALICOAT institute excludes some critical class 2 RAL shades from the certification.

Excluded RAL-based colours by Axalta

Our R&D department is continuously improving and further developing our RAL-based, Alesta® SD colour offering. Currently we exclude the following RAL shades in addition. These colours might become available in the future, consult us for more information.
