

Alesta® WR - Wheel Refurbishment

With our new Alesta® WR Collection for aluminium and steel wheels, we offer a range of innovative powder products for all your wheel refurbishment and customisation needs.

Products include Functional Primer, Alloy Sparkle Silver, Gun Metal, Anthracite Metallic, Ultra Chrome and a high performance Clearcoat. In addition, we have a range of Candy coloured clearcoats and a Metallic Sparkle clearcoat that can be used to overcoat solid colours, thus creating a fantastic range of metallic colour possibilities. This collection of perfectly optimised products allows you to offer extremely high quality alloy wheel repair and customisation at a realistic price.

We take pride in our reputation for quality, reliability, service and value. In addition, we recognise that the customer is key to our business, from initial contact through to aftersales service. Such is our reputation that high-end restoration companies for both cars and motorcycles are happy to rely upon our products, which are manufactured and tested to an extremely high standard.

Highlights:

- Complete range of trendy wheel colours on stock
- Candy coloured clearcoats
- Innovative Metallic Sparkle clearcoat
- Bonded silver and chrome-effect products to ensure ease of application and colour stability
- Optimum intercoat adhesion
- Superdurable clearcoat for outstanding protection against the elements
